Designs

In our lab we can prepare individual graphic designs. Our team of graphic designers will advise and create what your imagination suggests. We prepare a visualization of a company logo, catalogue, folder, and even large banners.

Printing

We print, fold, glue, bind and create for you all that offset and digital printing offers, whether it is a simple business card, flyer or catalogue, and perhaps you need to have non-standard documents in your company to make records of trade in goods, finance or other things? You are in the right place.

Key

Printing in CMYK colour (4 colours)

Print in Grayscale (1 colour)

Single-sided printing

Double-sided printing

This symbol indicates coating.
In the case of digital printing it means a film gloss or matt finishes. With the offset it means, in addition to the foil, gloss or matt finishes. With large-format printing it means a laminate from a roll.

Selective varnish (UV)

Punching - cutting punch

Perforation

Folding leaflets in the so-called "Z"

Folding leaflets in the so-called "U"

Perfect Binding

Spiral Binding

Saddle stitching

Cutting with the OPOS system

Liquid laminate

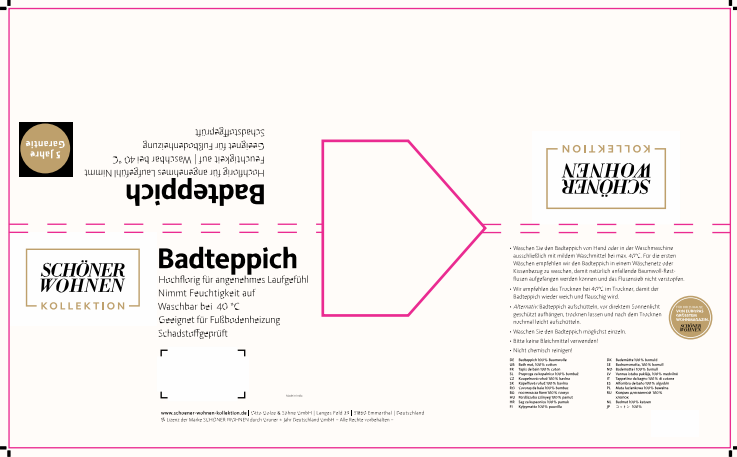

Business cards

U Cards

Letterhead

Letterhead acts as a relay of basic contact data about your company, but is mainly used for correspondence with clients and for the company documentation. Using the company's stationery dramatically improves their image, and also has a positive effect on the perception of the company as vibrant and modern. This type of paper is offered in a basic weight of 90g, on request we can apply a higher weight. The minimum issue in digital print technology is 50 pieces, and in offset printing technology the minimum is 250 pieces.

Folders

The use of different kinds of folders can be used to consolidate the company's brand on the market.

The most commonly used are bid folders, as a form of protection for commercial documents and marketing materials. Depending on the purpose and needs, we offer a folder with increased volume and thickness of the back.

For increased durability and aesthetics, we can use a number of finishes in the form of surface coating with a dispersion varnish, we can use the foliation (mate or gloss) or lay selective UV varnish, which will

expose selected graphic elements.

Stickers

Stickers are an excellent form of advertising. Whether they are stickers for children or logos handed out at jamborees and fairs, they all serve their purpose by constant contact with the customer.

Stickers also are used in technical processes - as warning or describing stickers.

Our stickers, thanks to the use of OPOS cutting become unique in their appearance and therefore stand out among other stickers.

Labels

One of the most important elements of advertising is product appearance. The consumer, deciding to purchase a particular product, is usually guided by emotions that are triggered by appropriately selected colours for the product. Our company has rich experience in both designing and printing a wide variety of labels for many manufacturing industries.

We offer self-adhesive labels on paper or foil, matt or glossy, digital and offset printed.

Large Format

What would advertising be without a banner, roll-up or poster? Let yourself be seen through outdoor advertising in various sizes and forms. In size we are only limited by our imagination, and you?

Roll-Up

The roll-up is a very functional and practical promotional and advertising carrier. Its main advantage is its lightweight aluminium construction. The internal cartridge with graphics allows you to quickly disassemble and assemble it anywhere. Everything is housed in the cover, which facilitates convenient transportation. In addition to advertising a roll-up can be used as a carrier of information and organization, thanks to which it is very often used for promotional purposes on training symposia, etc.

We offer roll-ups available in the formats 80x200, 100x200 and 120 x 200 cm.

Stickers

Stickers printed on various types of foil play an important role in the functioning of large companies. Their main advantage is a broad spectrum of bases on which they can be applied and any shape, size and colour. As a direct manufacturer we offer stickers both the matt and flash, and the orders are within a short time. We have our own qualified installers who perform sticking them on sites, cars, billboards, hanging banners, etc.

Posters

Show your design in a large format and stand out among others. Posters give unlimited transfer of information. Our unique offer includes posters in rare formats that you can specify on your own.

OWV foil

Foil with mesh structure allows the flow of daylight, is a great medium for advertising – for both long exposure and short marketing campaigns. Easy application on the display window or on the rear car window. It enables visibility from inside to outside but not in the other direction.

Magnetic foil

The magnetic foil is a graceful medium for advertising because it does not leave any marks on the surfaces used. It is used on any metal surface, on vehicles and refrigerators. It can be a nice gadget to the office, school or home.

Reflective tape

This is foil which has highly reflective microprisms in its structure. It is used as a material for the production of directional and informational signs.

Gadgets

Gifts, gifts, gifts. Who does not like to get ... and it is even better to give them. If you want to thank customers, contractors, distinguish someone or to show liking, create your own individual gift and delight the recipient.

Textiles

We have our own machines for printing and decorating clothes. Depending on the load of material and using different techniques we print on T-shirts, shirts, sweatshirts, hats, and other fabrics. We have a full range of clothing sizes and we also print on materials entrusted by the Client. We carry out orders from 1 piece.

Lanyards

Sublimation printed lanyards are a great solution that allows you to stand out from the crowd because you are getting a high quality product at a very affordable price. Sublimation technique allows you to print virtually any graphic motif FULL COLOUR. Thanks to this they are the best-selling model of the advertising lanyard.

Lanyards are made of polyester of a width of 10, 15, 20 or 25 mm, on which you can be applied any printing in the CMYK palette. Printing is undetectable under the finger and allows a very good and accurate reflection of the small details of tonal gradations, with photos included. It is a technique recommended for printing projects containing a large number of colours.

A standard lanyard is a metal snap hook for keys, you can, however, attach practically any kind of accessories to it.

Pens

One of the promotional gifts given to customers is a pen. This relatively inexpensive gadget usually helps improve the opinion of the company, but in practice a long time of using it means promoting the company's services or products.

We offer clients both plastic and metal pens. Depending on the material from which the pen is made we usually use etching techniques, or pad printing. The minimum number starts with 50 pieces.

Reflective bands

In order to ensure safety on the roads and bike paths various types of reflections are used. We suggest bands that are widely used and are an easy to use gadget. They are applied on the wrist, ankle or leg or fashionably attached to the backpack.

A notebook page with a white background. The top left corner features a grey, crumpled paper texture. Below this, the word "Notes" is written in a simple, black, sans-serif font. The right side of the page is decorated with a large, vibrant, multi-colored geometric pattern composed of many small triangles, creating a low-poly effect. The colors transition from deep purple and blue on the left to bright yellow and orange on the right. The overall design is modern and artistic.
